**Re:** Request for Agency Exemption – Shepherder Gravel Pit

---

Flathead County Road and Bridge is planning on building a 40 foot x 60 foot metal sided shop with a ridge pole height of approximately 24 feet at our Shepherder Gravel Pit located at 203 West Valley Drive in Kalispell. The building will be used for storage of equipment and associated tools/materials. After our discussions with the Flathead County Planning Department we are of the understanding that an Agency Exemption will be needed due to the zoning in the area. Our construction is slated to occur this fall but could be delayed until next spring.

Please accept this memo as our request for the exemption and let me know if there is any other information you are of in need of for this request.
